Subject: Proposed Microsoft settlement

To Whom It May Concern,

Letting Microsoft donate PCs and their own software is an outrageous settlement. Please don't let Microsoft get away with that. Microsoft is a bully. Its punishment must be more than a wink and a "don't let it happen again, son" speech.

At the very least, Microsoft must be made to donate software by other manufacturers and computers that don't run Microsoft's operating systems. Increasing a monopoly's market share is a strange way to punish a monopoly.
